

# VILLAGE NEWS

Keep up to date by checking out the website [stgeorgesvillage.ca](http://stgeorgesvillage.ca)

## Facebook

We also have a private Facebook page. In order to be on this page you have to be a member. You have to be invited by a member of the group. If you would like to be in this group please email [rkozol@me.com](mailto:rkozol@me.com) with the Subject "Facebook Signup"

## Zoom

During these times of isolation (and it looks like it may be a while yet) it is important to keep in touch and a great way to do that is through Zoom. Zoom is a very easy way to have face to face conversations with others and groups. The new website has instructions on how to use Zoom and again if you have any difficulty ask Becki Kozol and she will get you set up

## Internet connection

Not signed up for internet connection? That shouldn't be a problem there are so many connections in the village that they overlap. Why not team up with a neighbour and share a connection

## Check out the updated Website

### *Our Website has a new look*

The website is under construction and being updated but we would appreciate any comments that you have or ideas of what you would like to see on the site.

It now has a members only area. When you click on the members only section for the first time it will ask for your name and email and for you to add a password for the site. This information is only for you to access calendar, contacts in the village, forms newsletters etc. We have also included a buy and sell area where you can list items for sale or wanted items.

If you have any ideas or problems please contact Becki Kozol in unit 46 at 778 240 4210 or email [rkozol@me.com](mailto:rkozol@me.com).

## Tech Corner

During these times many of us have had to learn to communicate in new ways. One of the easiest ways is by communicating online. This isn't a problem for most people but there are so many ways that it can be confusing.

If you are on a Mac or have Apple devices people will say "I will FaceTime you". FaceTime is just like making a phone call but instead of just hearing the caller you can see the caller. Your phone, computer or device will ring and all you have to do is accept the call.

During the past year many of you have been meeting platforms like "Zoom" or "Microsoft Teams". These platforms allow many people to meet at once. For these platforms you are sent a link in an email and you simply click on the link. The first time you may be asked to download the program, but if you just follow the steps things should work. It is always best to try this out before there is an important meeting or call you are a part of.

## Zoom at St. George Village

St. George Village has a Zoom account and it is a good way to meet for committee meetings and General meetings in these times when we cannot meet in our meeting space because of Covid Protocol. If you would like to learn more about Zoom the following website has good, easy to follow directions

<https://www.seniorsguide.com/technology/a-step-by-step-guide-to-a-zoom-meeting/>. There are also many YouTube Videos if you prefer visual instruction

<https://youtu.be/rt7wtzeknFg>

If you have any difficulty please feel free to contact
